HoloLens

the augmented reality smartglasses by microsoft

Our Plan for 2016-2017

Virtual School

Authentic learning enhances the effectiveness and attractiveness of teaching and learning.

Virtual Laboratory

Bring Science to life with augmented reality and 3D models of scientific structures.

Our own cloud infrastructure and applications developed for students, by students.

Planetary Exploration

Augmented reality brings dinosaurs, planets and even NASA's rover camera to life.

3D Designing & Printing

With augmented reality, 3D-printed models can now be viewed and designed in the air.

Entertainment

Redefining entertainment with games that interacts with our surroundings.
